Trade Date:	18-04-2019

## TRADE NOTICE

**Subject:** Maximum Tariff digits after decimal points.

This is in reference to the invoicing for Marine charges, while conversion of tariff from INR to USD, Marine tariff for some services have reached beyond six (6) digits after decimal place, which has a system limitation. As a solution to it, we need to have maximum six (6) digits for invoicing purpose.

**For example:** Anchorage Tariff USD 0.0006111 (7 digits). This will be upward rounded off to USD 0.000612 (up to maximum 6 digits).

Hence, to keep it simple it has been decided to maintain the tariff maximum up to 6 digits after decimal, accordingly henceforth all such digits after 6 decimal places will be rounded off upwards.

This is applicable with immediate effect.
